Can ISO Master Clone Photos and Videos? If you are thinking about cloning photos and videos, then you can do it using the ISO Master software. Clone CD images and videos Clone CDs is a very basic tool, but it allows you to create a bootable CD image from a CD. Open the desired image file and launch Clone CD. The program will show you a number of data sources for cloning. Choose CD, DVD, CD-R, DVD-R or CD/DVD, depending on your needs. In the next window, you will have the choice between saving the file on your hard disk or disc drive. You can even launch ISO Master if you are interested in having the needed clone image to be used as bootable media. Clone DVD images Clone DVD is another tool, but you can clone DVDs only if they are writable discs. Open the desired DVD image, select the location for saving the image, and then choose Clone DVD. The program will show you some basic options. From the list, you can select "Full disc clone" or "Disc header clone", depending on your needs. Clone images and videos Clone images and videos is one of the more advanced tools available in the ISO Master software suite. Open the image file you would like to clone and launch Clone Image and Video. The program will allow you to create a new image from scratch or to start from a currently open one. Select the type of image you are going to create. This will let you add more details to the image, such as a custom boot sector or an ISOLINUX file. Use the Browse button to locate the needed file. It will then open in the image editor. Selecting the desired file, you will then have to rename the file. The next step is to select a location for saving the image. When done, hit the Create button. ISO Master Options The ISO Master toolbox lets you perform different operations that you will come across when cloning images. Open the desired disc image and launch the ISO Master. Use the Find button to locate the files you need to clone, so the process is more efficient. You can choose the number of clones you want to save, starting from 1. Select the desired disc types and location for saving the images

After the recovery I wanted to put the archive on my new computer but I couldn't do it. The ISO Master program I had didn't read the ISO file I had made. It said that it was damaged or something along those lines. So, I contacted the developer and he sent me the ISO Master 5.7.35 that I have now. It works like a charm, it reads the ISO file I made, and I can burn it to a DVD. I can also mount the ISO file on another computer and open it up with the ISO Master program. Thanks, developer, for making such a great program, it saved my music for sure. - Paul Smith You can write two bootable DVDs using ISO Master by copying the ISO file to the DVD Drive.
