For example, the magnetic device may allow for a denser and faster memory. Also, the magnetic device may have non-volatile, radiation hardened properties. In an MRAM device, the electrical resistance of a memory element can be switched between two resistance states by an external magnetic field. The resistance state can be read using the magnetic field provided by a sense current. Thus, MRAM devices do not require a current to read the memory state, as do conventional magneto-resistive read only memory (MROM) devices. The MRAM device includes a magnetic tunnel junction (MTJ). The MTJ may include two ferromagnetic layers separated by an insulating (tunneling) layer. When a voltage is applied across the MTJ, a tunneling current may flow through the insulating tunneling layer, and the resistances of the two ferromagnetic layers may depend on the magnetization states of the fer

The crew on board the Royal Navy flagship finds you on a day off. Join them to explore the beautiful ship, full of life, color and energy. Wind blowing in your face you explore the ship's high deck and enjoy the ship's view. This is an interactive virtual voyage with a lot of surprises. Explore the ship and enjoy a really amazing movie. Features: - 4 screensaver views: Welcome screen, ride for first time, actual ship, ship's view - Ships and sea life models - Right click menu: Pan around the screen, fast forward or rewind slideshow - A music which you can set, too. - Adjustable sound volume. - Beautiful 3D graphics. - The music of "Wind of Queen Victoria" - A great experience - Quality 1.3 megabit 2D animation - A quiet, light program What's new in this version: Added: Second ship theme Added: Redelivery theme Added: More ships and ocean life models Added: Adjustable sound volume Added: Adjustable contrast Added: Audio recorder Added: FaxsQ: Python Unicode: extract word boundaries using regex I would like to extract the substring surrounded by the word boundaries, using regex. Example: a = 'test' The goal is to retrieve "test". I used re.sub which works as follows: >>> import re >>> a = 'test' >>> r = re.sub(r'(?>> r 's' But the output "r" above is not what I want, because the boundaries of the word "test" were not considered. In other words, re.sub does not consider the boundaries. It would be fine if I could modify "re.sub" so that it considered the boundaries. However, I did not find any information. Any ideas would be greatly appreciated. A: The caret?>> re.sub(r'\b(\w+)\b', '', a) 's' Male Peep 6a5afdab4c

Enjoy breathtaking 3D graphics view on the impressive ship of Queen Victoria: Explore the ship's bridge, look at the living quarters of the officers, feel the humidity of the tropical climate. Features: Extreme high-definition quality 3D graphics with special effects Immerse yourself in the magnificence of the Queen Victoria Beautiful and authentic soundtrack Many special 3D effects Completely free of charge Just been looking for a screensaver of a ship for a while. I decided to use what I found on this site: I really like the colours. I put the live music link in, as there is also a song I like which I can't find anywhere else. I am in the process of creating a new computer, so I am just glad that I found this place. Kids sieve is very good, I have used it for the last ten years Free screensaver downloads Hi there, I discovered this site today searching for screensavers and wondered if anyone had tried this ones, Ive given it a go and did what had told to do to use it. Have just one small issue it wont work. If you load it into the internet security take a look at this: Pity dont seem to be able to do a system restore/repair but that just mean more investigation right. Anyway looks like a great site, gonna do my rounds from now on over to this site, there looking very interesting. Thanks. Free screensaver downloads I must admit I'm a bit of a navy fetishist I've been looking for something like this for ages Free screensaver downloads Goodness! A military & naval themed screensaver! I've used this one, I just took it out and passed it around to everyone at my company. I'm pleased to say that everyone has been impressed and has found it to be really good. There is a little difficulty loading it as the first time you run it, a security window appears and asks you to accept the certificate. At the first time I uninstalled it and reinstalled it once more. For more information please read this thread >> Free screensaver downloads I just noticed this while surfing around the forums, seems to be a good quality screensaver and has a nice tune. I downloaded it an ran it
